

From ninth grade to what's next.

Starting high school? Build the four-year plan now, keep every door open, and see the path to college from the first day of 9th grade.

Example: planning 9th grade with all four years in view				
Grade 9	Grade 10	Grade 11	Grade 12	Next
✓ LA 9 Honors	✓ LA 10 Honors	AP Language needs 93% in LA 10 H	AP Calculus AB kept open in 9th	College list started
✓ Geometry Honors	✓ Algebra II H	AP Precalculus	✓ AP Literature	Pathway: engineering
✓ Physical Science H	✓ Biology H	✓ AP US Gov	✓ Senior Seminar	Counselor questions
✓ Research & Design				

Honors Physical Science requires Honors Geometry at the same time. Taking both in 9th keeps AP Calculus open for senior year.

What a plan check catches.

- A careful parent planned every course: 24 credits against 21 required. Checked against the school's published rules, the plan didn't graduate.
- Math, 1 credit short. 8th-grade courses counted as electives.
 - English, 1 credit short. AP Literature is a 12th-grade course.
 - A 9th-grade requirement was never scheduled.
 - A senior-year requirement was planned for 11th.

Four-year plan

Every course from 8th grade on, including online, dual-enrollment and study-abroad courses, planned together as a family.

Graduation check

Credits by subject, GPA, and exactly what's left, using your school's own rules. Wrong-grade courses get flagged.

Colleges

Build a list, track every application from "considering" to "enrolled", and see every deadline in one place.

Ready for the counselor

A running list of questions tied to each course, and a one-page sheet to bring to the meeting.

4

problems the plan check found in one careful family's plan, caught in 9th grade instead of senior year.

Parents get their own account.

Link one or more students and edit the plan together.

We never sell student data.

No ads and no lead lists for colleges. Export or delete everything.

Your school's data, only if you say so.

Connect a school graduation tracker to see verified credits; disconnect any time.
